

SILICON VALLEY CLEAN WATER CONSTRUCTION NOTICE

JUNE 2019

Construction of Temporary Access Road to Commence on Bair Island To Support the Silicon Valley Clean Water Regional Environmental Sewer Conveyance Upgrade (RESCU)

TEMPORARY CONSTRUCTION WORK

Construction will not affect the 1.7-mile Bair Island Trail. Access will be limited on the short section of the bicycle and pedestrian path from Whipple Avenue to the main trail.

This work will not impact the official entry to the trail on Bair Island Road.

Silicon Valley Clean Water (SVCW) is collaborating with Don Edwards National Wildlife Refuge regarding plans for maintaining access to Inner Bair Island during construction, and facilitating ongoing restoration efforts following construction completion.

Work will commence in late June on Inner Bair Island, including construction of a temporary 1-mile long access road from the Whipple Avenue interchange to the north end of the island.

The road is necessary to provide access to a tunnel boring machine (TBM) retrieval shaft that will be built during the summer and fall of 2019.

At the Whipple Avenue entrance to Bair Island, the public connector trail will temporarily narrow due to space constraints and kept to a minimum five-foot width. During periods of heavy construction traffic, the Bay Trail crossing at Whipple Avenue will be managed with flaggers to maintain public safety.
